

M145 Machine Gun Optics

Mission

Enable better target detection, identification, and improved hit probability with a telescopic sight for the M240B Medium Machine Gun and M249 Squad Automatic Weapon in the light machine gun role.

Description and Specifications

M145 Machine Gun Optics (with anti-reflective device) provide machine gunners with the capability to detect, identify and engage targets at extended ranges. The three to four power magnification and wide field of view make this product configurable to mission profiles, operational modes and environmental conditions. Part of the Rapid Fielding Initiative for 2005, the M145 fits on the M240B for Infantry, Armor Cavalry, Special Forces, and Combat Engineer Units. In a light machine gun role, it fits on the M249.
